

**Name: Abate Sheleme Negeri**

**Title: JavaScript/Front End/React UI/Full Stack Developer**  
<https://abatenege.com/>//<https://www.linkedin.com/in/abatesh/>

**Email: abatesh2016@gmail.com**

**Phone Number: +1 614 615 9996**

## **SUMMARY**

- Proficient in developing web applications using React, Redux, HTML5, CSS3, and JavaScript.
- Hands-on experience in designing, developing, and maintaining web applications and APIs using Node.js.
- Strong experience in creating responsive and mobile-friendly web pages using Bootstrap and other CSS frameworks.
- Experience in working with various databases like MySQL and Oracle.
- Experience in building RESTful APIs using Express.js. .
- Experience in working with Agile methodologies like Scrum and Kanban.
- Strong problem-solving and analytical skills to identify and troubleshoot issues.
- Excellent verbal and written communication skills to collaborate with cross-functional teams.
- Ability to work independently and as part of a team, managing multiple projects simultaneously.
- Strong attention to detail, ensuring code quality, and following best practices. .
- Experience in integrating third-party APIs like Stripe and PayPal.
- Strong understanding of web performance optimization techniques and tools.
- Experience in version control using Git and GitHub.
- Understanding of web accessibility guidelines and standards.
- Ability to create responsive and adaptive UI using CSS media queries.
- Experience in using JIRA for project management and issue tracking.
- Familiarity with web sockets and real-time communication using Socket.io.
- Experience in implementing authentication and authorization using JWT and OAuth2.
- Understanding of performance profiling and debugging using Chrome DevTools.
- Knowledge of TypeScript and its benefits for type checking and code structure.
- Experience in optimizing web applications for different browsers and devices.
- Strong understanding of software development principles and design patterns.

## **SKILLS**

### **API and Integration:**

RESTful APIs, Axios, Fetch API, OAuth, JWT.

<b>Security Best Practices:</b>	HTTPS, CORS policy, Input validation, Authentication and Authorization.
<b>Front-end Technologies:</b>	ReactJS, HTML, CSS, JavaScript, TypeScript, jQuery.
<b>Front-end Tools:</b>	Webpack, Babel, NPM, ESLint, Prettier, Stylelint.
<b>CSS Frameworks:</b>	Bootstrap.
<b>Server-side Technologies:</b>	Node.js, Express.js, SQL Server and Oracle.
<b>Real-time Technologies:</b>	Socket.IO Performance.
<b>Optimization Techniques:</b>	Lazy Loading, Code Splitting, Caching.
<b>Project Management and Collaboration:</b>	Jira, Trello, Microsoft Teams, Zoom.

## Work Experience:

**JP Morgan, New York, NY**

**Front End / React UI/Full Stack Developer**

**September 2020 – Till date**

### Responsibilities

- Develop high-quality, scalable, and maintainable software solutions using ReactJS, NodeJS, and other related technologies.
- Collaborate with cross-functional teams to design, develop, and deploy new features and enhancements to existing systems.
- Write clean, well-documented code that adheres to industry best practices and coding standards.
- Participate in code reviews, providing constructive feedback and guidance to team members.
- Debug and troubleshoot complex issues to ensure optimal system performance and stability.
- Develop and maintain technical documentation for all code and system changes.
- Stay up-to-date with emerging technologies and best practices in software development, and recommend ways to apply them in the company's development processes.
- Ensure that software applications are secure, reliable, and scalable, and adhere to industry standards and regulations.
- Participate in sprint planning, sprint reviews, and other Agile development processes.
- Mentor and guide junior developers, providing technical leadership and support.
- Manage code versioning and release processes using tools like Git and Jenkins.
- Develop and maintain APIs and microservices that integrate with other systems and applications.
- Build and maintain data models and databases using SQL technologies.
- Develop and maintain front-end applications using HTML, CSS, and JavaScript.
- Develop and maintain back-end applications using Node.js, Express, and other related technologies.

- Work with UX/UI designers to ensure the user interface and user experience of software applications meet the needs of end-users.
- Participate in code refactoring and optimization efforts to improve system performance and maintainability. Collaborate with QA engineers to ensure software applications are thoroughly tested before release.
- Develop and maintain documentation and training materials for end-users of software applications.
- Participate in hiring and recruitment efforts to build and grow the development team.
- Attend conferences, meetups, and other industry events to stay up-to-date with emerging trends and network with other professionals.

**Environment:** ReactJS, HTML, CSS, JavaScript, Node.js, Express.js, MySQL, SQL Server, Git, Visual Studio Code, JIRA, Trello, Zoom, Microsoft Teams, TypeScript, RESTful APIs.

**Das Health, Las Vegas, NV**  
**Front End / React UI**

**January 2018 – August 2019**

### **Responsibilities**

- Develop high-quality, reusable code using React.js and other modern front-end frameworks.
- Collaborate with UX designers, product owners, and other stakeholders to build web applications that meet the needs of healthcare providers and patients.
- Implement responsive designs that work well on desktop, tablet, and mobile devices.
- Write server-side code in Node.js and other appropriate languages.
- Integrate with RESTful APIs to retrieve and manipulate data from health systems and other sources.
- Test and debug code to ensure that it meets functional and performance requirements.
- Continuously refactor code to improve maintainability and scalability.
- Work in an Agile development environment and participate in sprint planning and retrospectives.
- Write comprehensive technical documentation and participate in code reviews.
- Mentor junior developers and contribute to their professional development.
- Stay up-to-date with emerging trends and technologies in front-end and back-end development.
- Troubleshoot issues with web applications and provide timely resolution.
- Optimize web application performance for fast load times and smooth user experience.
- Create prototypes and proof-of-concepts to test new technologies and features.
- Participate in product demos and provide technical support to stakeholders.
- Contribute to the development of best practices and coding standards for the organization.
- Collaborate with other developers and cross-functional teams to ensure that web applications are integrated with other systems as needed.

- Participate in user research and usability testing to gather feedback on web applications.
- Contribute to the development of user stories, acceptance criteria, and other requirements documentation.
- Develop and maintain data models and database schema for web applications.

**Environment:** ReactJS, HTML, CSS, JavaScript, Node.js, Express.js, MySQL, SQL Server, Github, Visual Studio Code, JIRA, Trello, Zoom, Microsoft Teams, TypeScript, RESTful APIs.

### Education

Program	Courses	School	Year
BA Degree	Accounting and Finance	Arba Minch University	2006-2008
MBA Degree	Accounting and Finance	Leadstar-Ashland	2014-2016
Certificate	Database Administration	Advanced Tech Ins	2020
Certificate	Full Stack Web Dev't	Evangadi Tech	2022

**Key Skills:** ReactJS, HTML, CSS, JavaScript, TypeScript, jQuery, Webpack, Babel, ESLint, Prettier, Stylelint, Bootstrap, Node.js, Express.js, Oracle, MySQL, SQL Server, RESTful APIs, Axios, Fetch API, OAuth, JWT, Socket.IO Performance, Lazy Loading, Code Splitting, Caching, HTTPS, CORS policy, Input validation, Authentication and Authorization, Git, GitHub, Jira, Trello, Microsoft Teams, Zoom.
